Haiti Home Repair

Location:

Haiti, Les Cayes Area, Tricon Cō-Impact Sourcing® Region

Essential Oils from this Location:

Vetiver

Project Cost:

$45,000

Estimated Impact:

48 homes returned to livable status following the 2021 earthquake

Background:

- On August 14, 2021, a devastating 7.2 magnitude earthquake shook Les Cayes, Haiti, destroying homes and affecting the lives of dōTERRA's Vetiver producers in the Tricon community.
- Earthquake damage has forced many of our farmers and their families from their homes. One farmer noticed that the walls in his children's bedroom had cracks and were missing bricks, making it an unsafe place to sleep. Another farmer lost part of his roof, in addition to broken windows and cracked walls.
- Rising construction costs have made completing these home repairs challenging. Funds from this project will be able to provide safe, secure homes for the dōTERRA farmers that do so much to provide the pure Vetiver essential oil we all love.

Disclaimer:
Once a project is claimed for adoption, the expectation is that the Wellness Advocate and team will raise the agreed upon funds within the timeframe.
